THE TEAM THAT NEVER STOPS WORKING

I am sure that the majority of you, our customers, have met the president of Trendex, Mr. Soumitra Mukherjee. But he is only part of the team here at Trendex. The other part of our team consists of three hard-working ladies. I am sure you have probably spoken to them many times over the phone as they are always there to fulfill your everyday software and technical support needs. They are ready to serve you, the client, whenever an obstacle arises.

Simona Solomon is our in-house programmer/analyst and does most of the major programming on the system. She answers many support calls and can always find a solution to the problem at hand.

Jenny Palma is also a programmer/analyst, but her knowledge also extends beyond the field of programming. Jenny is normally the one who takes care of the hardware, be it facing technical problems or assembling the servers. She also answers many support calls.

Anna D'Urbano is the office manager. She answers the majority of the phone calls and tests new programs to ensure

The Trendex Team: (From Left to Right) Simona Solomon, Jenny Pal-

customer satisfaction. Anna makes sure that the job is done right and that the product will meet the client's ever-changing needs.

Finally, we have Soumitra Mukherjee. He makes sure Trendex and its client base is expanding. He is the president of the company and has kept it running for 23 years and counting.

Finally, it must be said that It

has been a pleasure to serve you over the years. As Aristotle once said "Pleasure in the job puts perfection in the work."

ROUTREND

With a new Hand-held Computer the possibilities are limitless. Take physical inventory easily or use the device to create invoices in the truck. Mobile Invoice Entry now allows you to calculate and print invoices right in the truck. Invoices for gases can be generated

with unit prices, extension, hazmat and fuel surcharge. Invoices are printed on a 4" receipt printer directly in the truck. Information collected can be automatically transferred to the main system each day. As well as invoicing from the truck, the Hand-held

Computer can also be used to take Mobile physical Inventory using bar codes. This data can then be transferred to the server and inventory quantities can be adjusted.

Handheld Computer for Routrend

NEW FEATURES IN VERSION 9.50

- **Options below must be purchased:**

- **Receipt Printer:** You can now print your counter sales invoices on a receipt printer on 3" roll paper in order to save money on pre-printed business forms. The Gastrend software will allow you the option of printing to the pre-printed 8.5"x11" form or on the receipt printers.

- **Fax & E-mail all forms:** Now you can fax or e-mail your Gas/Product Invoices, Cylinder Rental Invoices, Lease Invoices, Statements, Purchase Orders and Quotations directly from the server. The savings in stamps and manpower is enormous not to mention that you get your invoices to your customer faster and get paid sooner.

- **Create PDF Reports:** Create any report from the Gastrend software in a PDF format for viewing with Adobe Reader or for e-mailing purposes.

- **Lot Number Control for Gases:** This new option will allow you to track Medical Gases by Lot Number. A search can be done by Lot Number to find all the customers to whom a specific

Epson Receipt Printer

Lot Number was delivered.

- **The following programs will be included in the upgrade version 9.50:**

- **Purchasing & Selling Units of Measure can be different:** Now the system will allow you to purchase a product in one unit of measure (ie: Box of 100) and sell it in a different unit of measure (ie: Each). The cost will be automatically calculated by the system.

- **Kitrend Stock Work Order:** Kitrend now allows entering Kits for Gases. You can now create a Work Order for items produced for stock. Therefore, if you are filling gases, the Stock Work Order can be used to deplete your Bulk Gases and add the filled cylinder to your inventory.

- **Inventory Report Sorted by Turns:** This option will let you know the products that turns the most and the ones that do not. This allows you to act on your dead stock.

- **Accounts Payable Trial Balance for Specific Days:** The Accounts Payable Trial Balance will now print only the invoices over a specific number of days. Therefore, you can only see the invoices that are payable over 45 days. The number of days is selected by the user at time of printing the report.

- **Commission Paid on Paid Invoices:** You can now control when commissions will be paid to the salesrep. The commission report will let you know if the customer has paid the invoice and the commission to the salesrep can be paid only after the customer pays you. This option is only available for split commissions.
